

**LESSON PROPS
AND QUESTIONS**

Because the bridge appears to be over our heads in the picture below, it begins in the foreground, and links that spatial region to the middle ground.

1. Which objects show a complete contour?
2. Which objects have parts of their contour hidden?
3. What is the largest object in the picture?
4. To what spatial region does it belong?
5. Does it touch any other regions?
6. Are there objects from different regions that touch and overlap?
7. Are there lines in the picture made from parts of different contours?
8. How many contour lines can you link together, even if they are not touching? How would you do this?
9. Do linked contour lines connect different parts of the picture? How do they do this?
